Make A Connection

The 2545 with 9-Bin Mailbox and 1,000-Sheet Finisher.

From Start To Finish

When you connect the Savin 2535 or 2545 Series to your workgroup, you'll gain the most technologically advanced document management solution you can get your hands on. While most output systems focus on, well, output, the 2535/2545 Series impacts every aspect of the document life cycle – from input to management to output.

Configured Any Way You Want

With the Savin 2535/2545 Series, you decide exactly what your document management solution looks like. You can start with a digital copier (2535/2545) and add network printing/scanning, faxing and LAN-faxing functions. Or, choose the standard digital copier/network printer version (2535p/2545p) and add the optional fax and LAN-fax functions when you need them. Plus, expanding

the capabilities of the 2535/2545 Series is as easy as adding memory – no need for costly controller boards.

A True Team Player

There's more to document management than printing or copying, and the Savin 2535/2545 Series incorporates advanced capabilities that everyone in your office can use to enhance mission critical business documents.

Sophisticated digital technology enables the 2535/2545 Series to accommodate a variety of business applications in walk-up or desktop environments. You can create persuasive documents that incorporate scanned hardcopy, electronic files or both. You can store and manage scanned images, print jobs and fax transmissions – all of which means that you have complete document control from start to finish.

Document Server

With the 2535/2545 Series' Document Server, managing paper-based and electronic originals is a snap. Thanks to a large hard disk memory capacity, the Document Server accepts input from a variety of sources – including hardcopy, print jobs, scanned images, fax transmissions and LAN-fax transmissions.

Once stored, you can easily manipulate documents from the control panel or from the desktop using DeskTop Binder V2 Lite document management software. Documents stored in the Document Server are completely searchable; can be merged to create entirely new documents; can be edited and can be output using a variety of methods – printed, re-faxed or distributed via e-mail.

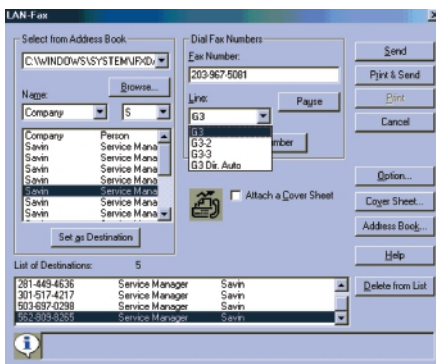

To The Intelligent

Connect up to three fax lines simultaneously.

Fax/LAN-Fax

You can look, but you simply won't find a more powerful fax system than the one you get with the 2535/2545 Series Fax Option. Ultra-fast transmission speeds, up to three lines available simultaneously – including ISDN digital faxing – and faxing directly from the workstation, combine for a high-end fax solution that meets the demands of even the most challenging communications environment.

With LAN-Fax, it's simple to fax right from your desktop.

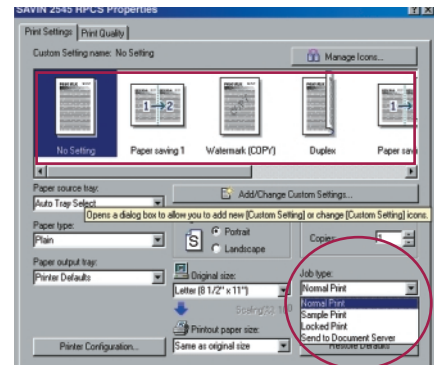

Hardcopy

Network Printing

Access to all of the advanced output and finishing capabilities right from the desktop is standard on the 2535p/2545p. Our exciting new PDL – Refined Print Stream Command (RPCS) – offers exceptionally fast throughput speed and a sophisticated Comprehensive Driver Interface that dramatically increases user productivity. Clear graphic icons allow you to apply basic and advanced features with ease. Optimized for Windows Clients, RPCS also facilitates high-speed processing of text and graphics files.

Offers Parallel, Ethernet or FireWire network print connections.

RPCS offers a comprehensive user interface and one-click print operations.

Network Scanning

Attach the optional Print/Scan module and Network Interface Card to the 2535/2545 and receive all the benefits of network printing and scanning. Network scanning enables you to build a digital document distribution and storage solution that allows you to integrate hardcopy onto your LAN and share information throughout your workgroup using ScanRouter V2 Lite software. Save scanned files to client PC hard drives, network file server or both.

Scanning Selections and Destinations are set at the 2535/2545 Control Panel.

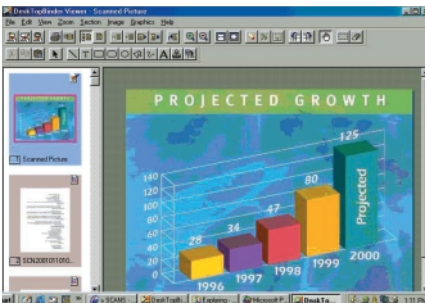

Imaging Solution.

Easily configure the 2535/2545 Series to suit your specific application needs.

DeskTop Binder V2 Lite

This powerful document management software enables instantaneous access to documents stored in the Document Server, Delivery Server, client PCs or on a network file server, and provides complete control of document input and output from the workstation.

Combine, print and finish multiple files as one job with DeskTop Binder and the RPCS driver.

An intuitive user interface – including Drag and Drop operation – makes it easy to copy documents between the

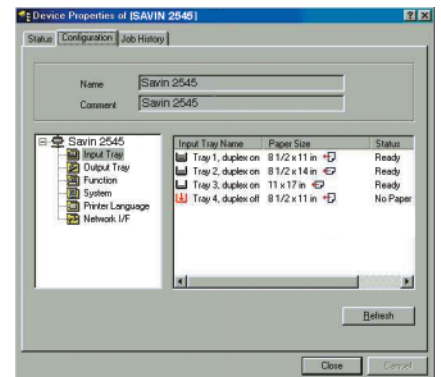

2535/2545 Series' Document Server, Delivery Server, network file server and client PCs. And, when you use the new RPCS driver, you can combine multiple files, apply finishing selections and then output the file as a single document.

Not Just Another Printer Management Utility

With systems as multi-faceted as the Savin 2535/2545 Series, you need an intelligent management utility, one that allows you to monitor all aspects of the 2535/2545 Series – copy, print, Document Server, fax and scan.

SmartNetMonitor provides real-time information – system configuration, system status, toner levels, and paper supplies – to users and network administrators, which enables users to manage their own tasks while reducing network administrator intervention. Additionally, SmartNetMonitor facilitates advanced

network printing functionality: shift print jobs to an alternate 2535/2545 Series system for job completion in the event the targeted system is unable to complete the job with Recovery Printing. Increase output productivity with Parallel Printing, which enables users to send large jobs to multiple networked 2535/2545 Series systems.

View paper options and supply from the desktop with SmartNetMonitor.

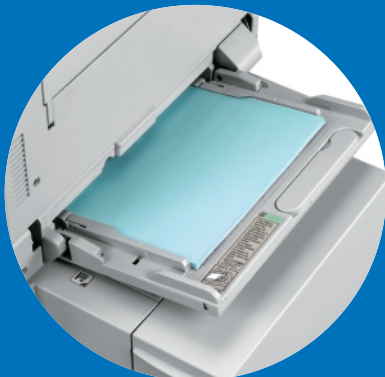

A Versatile Workhorse

Optional 80-sheet Auto Reversing Document Feeder.

Run large jobs uninterrupted with a maximum capacity of 3,550 sheets.

Use the 50-Sheet Bypass for special paper.

Separate print output from copy output with the optional Multi-Tray Finisher.

With the 2535/2545, you can have a variety of paper stocks and sizes available at all times.

Relax...You Just Met The Right One

If you've been looking for a document management system that addresses real-life business applications – your search is over.

For more information about the Savin 2535/2545 Series Document Management Solution, contact your authorized Savin sales location.

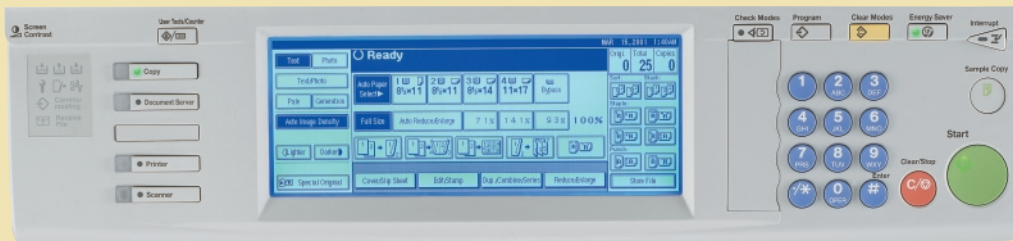

FEATURES

- > 600 dpi resolution
- > advanced digital features
- > 3,550-sheet paper capacity
- > ultra-fast fax option transmits up to 64 Kbps
- > standard or optional high-speed network printing
- > optional network scanning
- > SmartNetMonitor software provides real-time information

For more information contact your authorized Savin sales location.

2535/2545

COPIER & GENERAL SPECIFICATIONS

Configuration	Digital Copier
Copy Process	Dry electrostatic transfer
Copy Resolution	600 dpi
Gray Scale	256 levels
Standard Memory Capacity	32 MB RAM, 10.0 GB HDD
Continuous Copy Speed	35/45 cpm - letter size
Copy Size	Maximum: 11" x 17"; Minimum: 5.5" x 8.5"
First Copy	4.3/3.6 seconds (internal output tray)
Maximum Original Size	11" x 17"
Minimum Original Size	5.5" x 8.5"
Warm-up Time	15/20 seconds
Multiple Copying	Up to 999
Auto Duplex	Standard Unlimited
Standard Paper Capacity	500 x 2 + 50 sheets bypass tray
Total Paper Capacity	3,550 sheets
Standard Output Capacity	500 sheets (internal tray) + 125 sheets (external tray)
Zoom Range	25% - 400% in 1% steps
Enlargement	121%, 129%, 155%, 200%, 400%
Reduction	93%, 85%, 78%, 73%, 65%, 50%, 25%
Copy Paper Weight	20 - 28 lb. (Trays & LCT); 16 - 44 lb. (Bypass Feed); 20 - 28 lb. (Duplex)
Dimensions (WxDxH)	23.6" x 25.6" x 28.3"
Weight	165 lbs.
Power Source	120V, 60Hz
Other Features	Auto paper select, auto magnification, series copy, combine mode, cover insertion, OHP slip sheet, negative/positive, center/border erase, electronic sorting, paper designate, auto tray select, 100 user codes (optional 500 max.), 10 job programs, document server (3,000 file capacity), touch screen control panel, 95% duplex productivity, date stamp, page number stamp (optional pre-set stamp background numbering and user stamp)

SCANNER OPTION (with ScanRouter V2 Lite)

Scanning Speed	52 SPM – ScanRouter V2 Lite 34 SPM – Twain
Resolution	100/200/400/600 dpi
Memory	96 MB RAM shared with Copier
Other Features	Scan to file, scan to in-tray, duplex and halftone scanning, attach message NIB 10/100BaseT
Interface	TCP/IP
Protocol	Win95/98, NT, 2000, Me
NOS	

FAX SPECIFICATIONS

Compatibility	Group 3, G4 (optional)
Modem Speed	33.6 Kbps/64 Kbps (G4 option)
Scanning Speed	0.55/0.43 seconds
Transmission Speed	3 seconds
Transmission/Reception Duplex	Up to 11" x 17"
Memory Capacity	Reception/Transmission 2 MB SAF, 4 MB page memory upgradeable to 26 MB SAF, 12 MB page memory at 400 dpi 400 quick, 64 groups Optional 1200 quick dial/1000 quick dial & 200 speed dial
Auto Dial	Dual access, image rotation, reverse order printing, 1 hour backup, book transmission, optional memory, optional JBIG, simultaneous operation of up to 3 lines (G3 x 3 or G3 x 2 + G4), LAN-Fax capability with network printing installed
Other Features	

PRINTER SPECIFICATIONS

Print Speed	35/45 PPM
Language	PCL5e, PCL6, RPCS (standard) Adobe PostScript Level 3 (optional)
Resolution	600 dpi/300 dpi (PCL5e) 600 dpi (PCL6) 600 dpi (RPCS) 600 dpi/300 dpi (PS Level 3)
Memory Capacity	2535/2545 (32 MB + optional 64 MB required) 2535p/2545p (96 MB RAM standard) 10.0 GB HDD shared with copier
CPU	RM5231, 200 Mhz
Drivers for PCL	Windows 95/98/NT 4.0/2000/Me
Drivers for PS	Windows 95/98/2000/Me, Macintosh
Fonts	
PCL6 (5e + XL) & PCL5e	35 Intellifonts, 10 TrueType Fonts, 1 Bitmap Font, 136 Adobe Type 1 Fonts
PS3	136 PostScript Fonts
Utility Management	Net Vision, Port Navi, Desktop Binder V2 Lite
Other Features	Secure Print, Sample Print

OTHER OPTIONS

Auto Reversing Document Feeder DF70 – 80 originals
Platen Cover
One Bin Tray Type 1045 – 125-sheet capacity
Hand Set
SR720 Finisher (1,000-sheet) Stapler (30-sheet staple capacity)
SR760 Multi-Tray Finisher Stapler (50-sheet staple capacity)
2/3-Hole Punch Kit Type 1045 (requires Multi-Tray Finisher)
CS360 9-Bin Mailbox (100-sheet bin capacity)
RT36 Large Capacity Tray (1,500 sheets)
External Copy Tray Type 450
PS360 Paper Bank (2 x 500 sheets)
Bridge Unit Type 1045
User Acct. Enhance Unit (max. 500 User Codes)
